

FIBRE DISCS

**High-performance
fibre discs**

Our fibre discs

Your grinding operation

Deburring

Bevelling

Levelling of welding seams

Cleaning

Removal of imperfections

Smoothing and polishing

Grinding of cast parts

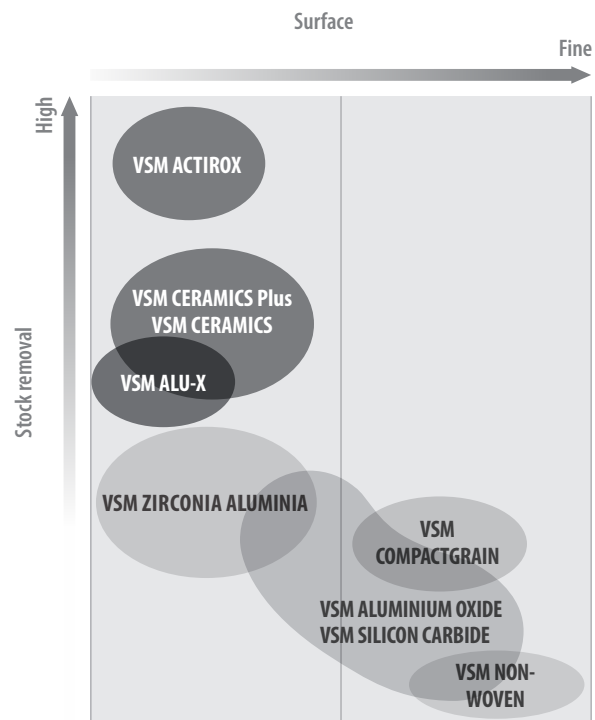

VSM – Your specialist for fibre discs

Your advantages at a glance

- > Excellent handling with **no noise or vibration** plus **extra edge flexibility**
- > **Optimum user protection** thanks to continuous quality assurance in line with stringent oSa requirements
- > **Maximum stock removal** and **faster grinding** thanks to geometrically shaped ceramic grain with **VSM ACTIROX**
- > Significant **reductions to chip adhesion** have been achieved with the new **VSM ALU-X** technology

VSM fibre discs are quality abrasives made in Germany.

The perfect fibre disc for every application

Dimensions and shapes of fibre discs

VSM fibre discs are suitable for a large range of applications. This is why they are available in a variety of different dimensions and shapes. In addition to slotted discs with a cross-shaped centre slot other shapes such as discs with a circular opening in the middle are included in our offering.

Fibre disc shapes	flat with centre hole	cambered with spherical cap, standard	cambered with recessed centre
 Non-slotted	S0	S01 (only \varnothing 180 mm and 235 mm)	S05 (only \varnothing 180 mm)
 Cross-shaped centre slot	S1	S11 (only \varnothing 180 mm and 235 mm)	S15 (only \varnothing 180 mm)
 Eight-way slot	S8		
 X-Lock	SX (\varnothing 115 mm and 125 mm only)		
 Special shapes (such as rosettes, polygon shapes) are available upon request.			

Accessories

- > **VSM fibre disc holders** are ideal for properly storing. The unique holder firmly keeps the discs in place and prevents any deformation.
- > VSM provides an extensive range of **backing pads** which are tailored to accommodate the VSM fibre discs.

VSM grain technologies in the spotlight

VSM ACTIROX

NEW

- > **Geometrically formed** ceramic grain
- > Maximum stock removal and a faster cut for superalloys and stainless steels
- > Cool grinding extends the service life thanks to VSM TOP SIZE

VSM CERAMICS · (CER)

- > Top product with **self-sharpening effect** for processing non-alloyed steels and stainless steels
- > Cool grinding allows longer contact times

VSM COMPACTGRAIN · (COM)

- > **Long-term abrasive** achieves reproducible surface finishes and consistent roughness
- > Continuous self-sharpening thanks to the granulate structure

VSM ALUMINIUM OXIDE · (AO)

- > Universal grain for many different metal applications
- > Ideal for intermediate grinding and finishing

VSM CERAMICS Plus · (CER Plus)

- > **Optimised self-sharpening effect** when processing high-alloyed steels ensures very high stock removal rates
- > Reduced temperature in the contact area
- > Significantly extended service life

VSM ZIRCONIA ALUMINIA · (ZA)

- > Abrasive with constant self-sharpening
- > Prolonged and high grinding performance
- > Very high stock removal for medium pressure applications

VSM SILICON CARBIDE · (SIC)

- > Very hard
- > Ideal for working titanium, glass, minerals, ceramic, china and stones

VSM NON-WOVEN

- > Perfectly follows the shape of a workpiece
- > For premium scratch patterns which can easily be reproduced
- > Available as AO and SIC

VSM grinding-active additional layers

VSM TOP SIZE
Less heat generated in the grinding zone ("cool grinding")

VSM TOP SIZE is recommended for dry machining heat-resistant stainless steels and non-ferrous metals. The grinding-active additional layer improves the cutting performance whilst reducing the temperature in the contact zone. This significantly extends the service life of the abrasive.

The new **VSM ALU-X** additional layer reduces chip adhesion and thus reduces clogging of the abrasive. The service life is assured and extended so that excellent stock removal is achieved even after longer periods of use.

Grinding-active additional layer reduces the temperature in the grinding zone

The combination of VSM CERAMICS and ALU-X significantly reduces chip adhesion

Recommended backing pads

TURBO PAD 1

Hard, with cooling ribs

TURBO PAD 2

Hard, with cooling ribs, cambered

TURBO PAD 3

Extra hard, with cooling ribs, cambered, for maximum stock removal

Universal backing pad

Medium-hard

VSM – More than just three letters

VSM stands for competence, quality and customer orientation

Very few others understand grinding processes like we do. Not only do we grind every surface to precision, we also analyse the specific grinding applications of our customers so that we can always find the best, long-term solution. Process-related expertise is one of the distinguishing features of VSM.

We know abrasives

Because we understand them. VSM develops and produces all the main preliminary products such as backing fabrics, resinoid bonds and abrasive grains at its Hanover site. By doing so, we fulfil our high, self-imposed requirements in industry, the commercial and trade sector. The continuous development of further grain compositions, their refinement and processing ensures that VSM remains one of the most experienced manufacturers of ceramic grain worldwide.

Application-based expertise

We see the entire grinding processes of our customers as a challenge. A global network of VSM specialists provides expert advice wherever it is needed

irrespective of whether your company is large or small. Thanks to our close collaboration with machine manufacturers, cutting fluid experts and research institutes, we ensure that our customers can benefit from technological trends as soon as possible.

We make our expertise available for you

The VSM Technical Center (TC) in Hanover provides an opportunity for product training, seminars and extensive application tests. Customer applications can be adjusted and results reviewed. This service from VSM reduces downtimes and productivity losses for our customers.

Certified and recognized worldwide

VSM has been certified to ISO standard 9001:2008 as its basis for quality assurance for many years. In addition, it is a member of FEPA, oSa and the German Abrasives Association (VDS).

A worldwide leader in abrasives.
