

VSM CERAMICS Plus
VSM CERAMICS

**Self-sharpening
ceramic grain abrasives
for high stock removal**

Our products

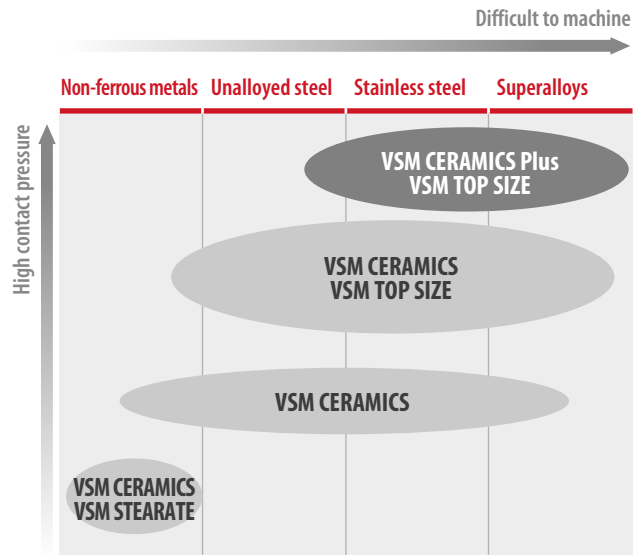

Your application

Turbine blades	Tools	Tubes	Plants and containers
			
Coils, sheet metal	Sanitary fittings	Castings and forged parts	Medical instruments
			

VSM CERAMICS for maximum productivity

Your advantages at a glance

- > With **VSM CERAMICS** and **VSM CERAMICS Plus** VSM provides two **innovative grain technologies** suitable for specific applications
- > A proven track record of up to **40 % increase** in **stock removal** and **service life** as compared to conventional ceramic grain abrasives
- > Cool grinding processes and enhanced service lives thanks to **additional grinding inducing layers** of **VSM TOP SIZE** and **VSM STEARATE** abrasives
- > VSM can be relied on to always deliver premium quality **made in Germany**

Premium quality thanks to preliminary products from our own production

Our high vertical integration enables us to achieve a consistently high quality of our abrasives. VSM develops and produces all the main preliminary products such as backing fabrics, resinoid

bonds and abrasive grains itself at the Hanover site. This is how we can make a grain which is perfectly tailored to your requirements.

Producing our own preliminary products in-house is a special feature of VSM's abrasives production

Finishing of the backing materials

Centreless grinding

VSM CERAMICS XK760X

Workpiece	Tubes Outer diameter 104 mm
Material	Chromium nickel steel (1.4301)
Contact wheel	<ul style="list-style-type: none"> > 450 mm diameter > Hardness: 60° Shore A > Serration: 2:1
Cutting speed	25 m/sec
Axial feed rate	2.5 m/min
Belt dimensions	150 × 3,500 mm
Grit size	40
Lubricant	Emulsion
Outcome	<ul style="list-style-type: none"> > Increase in cutting performance per abrasive belt from 600 to 900 parts. > Reduction in set-up costs.

Grinding of dished ends

VSM CERAMICS Plus XK885Y

Workpiece	Tank bottoms
Material	Chromium nickel steel (1.4301)
Contact wheel	<ul style="list-style-type: none"> > 390 mm diameter > Hardness: 80° Shore A > Serration: 10:8
Cutting speed	29.5 m/sec
Rotation speed	Manual
Belt dimensions	60 × 2,175 mm
Grit size	20
Lubricant	None
Outcome	> 100 % increase in the number of machined workpieces.

VSM CERAMICS abrasives for demanding grinding tasks

NEW

VSM CERAMICS Plus (CER Plus)

VSM CERAMICS Plus grains feature an improved self-sharpening effect when machining high-alloyed steels and super alloys, which are materials that require high contact pressure.

The unique structure of **VSM CERAMICS Plus** microcrystals enables a much more subtle breaking down of the grain and produces much sharper edges. This in turn leads to lower temperatures in the contact area and an extended service life.

VSM CERAMICS (CER)

VSM CERAMICS grains achieve optimum stock removal. They are the top products for a large number of stationary and mobile grinding applications. **VSM CERAMICS** also have an excellent price-performance ratio.

VSM additional grinding-active layers

VSM TOP SIZE

VSM STEARATE

VSM TOP SIZE is recommended for dry machining of stainless and heat-resistant steels and non-ferrous metals. The additional layer with grinding additives improves the cutting performance while the temperature in the grinding area is reduced. The service life of the abrasive is enhanced considerably.

VSM STEARATE optimizes the cutting performance of wrought alloys (NF metals) by preventing adhesion of the material to the abrasive.

VSM – More than just three letters

VSM stands for competence, quality and customer orientation.

Very few others understand grinding processes like we do. Not only do we grind every surface to precision, we also analyse the specific grinding applications of our customers so that we can always find the best, long-term solution. Process-related expertise is one of the distinguishing features of VSM.

We know abrasives

Because we understand them. VSM develops and produces all the main preliminary products such as backing fabrics, resinoid bonds and abrasive grains at its Hanover site. By doing so, we fulfil our high, self-imposed requirements in industry, the commercial and trade sector. The continuous development of further grain compositions, their refinement and processing ensures that VSM remains one of the most experienced manufacturers of ceramic grain worldwide.

Application-based expertise

We see the entire grinding processes of our customers as a challenge. A global network of VSM specialists provides expert advice wherever it is needed

irrespective of whether your company is large or small. Thanks to our close collaboration with machine manufacturers, cutting fluid experts and research institutes, we ensure that our customers can benefit from technological trends as soon as possible.

We make our expertise available for you

The VSM Technical Center (TC) in Hanover provides an opportunity for product training, seminars and extensive application tests. Customer applications can be adjusted and results reviewed. This service from VSM reduces downtimes and productivity losses for our customers.

Certified and recognized worldwide

VSM has been certified to ISO standard 9001:2008 as its basis for quality assurance for many years. In addition, it is a member of FEPA, oSa and the German Abrasives Association (VDS).

A worldwide leader in abrasives.
